

Date:		
Team Name:		

Directions:

Using a 1-5 scale, please circle the number that most closely represents your current state between the two statements below. On the left hand side are statements that might closely reflect current common behaviors in practice and on the right hand side are statements that may reflect a practice team's desired behavior. How to use the 1-5 scale:

- 1 = statement to the left most accurately reflects our clinic's current state
- 2 = we are closer to the left statement but making progress to move towards the right
- 3 = we have made considerable progress in this area, but still have a ways to go before we are at the desired state
- 4 = we are closer to the right statement but aren't reliably at the desired state
- 5 = statement to the right most accurately reflects our clinic's current state

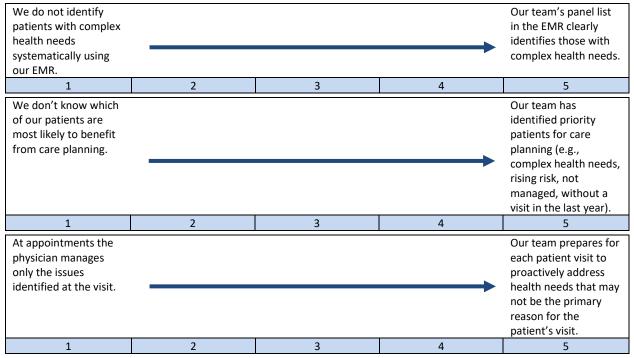

If it is difficult to assign a rating to your clinic, please use your current understanding and best estimate.

Questions you may want to consider:

- What is the range of responses across team members? What factors influenced this range of responses? How did team members in different roles differ in their responses?
- What were some of the highest scoring statements? What were some of the lower scoring statements?
- Where might you target improvement efforts?

Panel Identification, Maintenance and Management

PaCT: Team Assessment

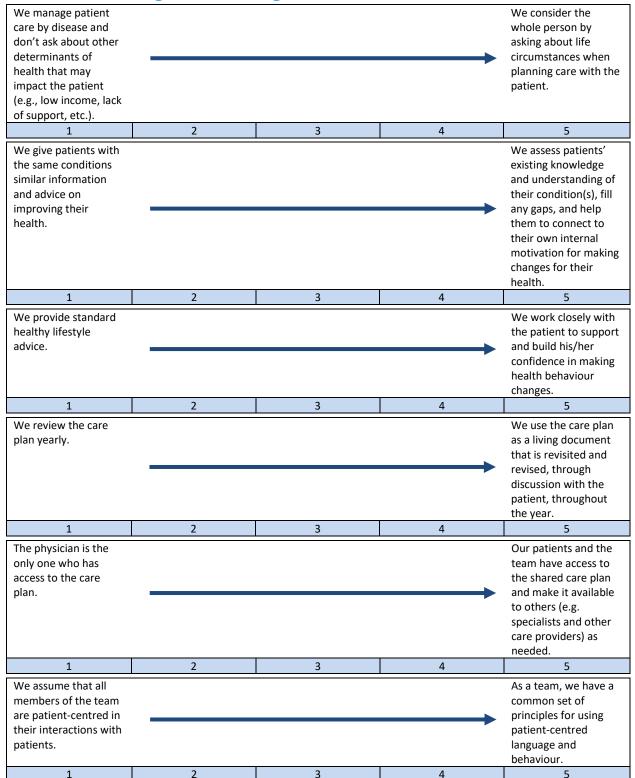

Team Activities

Our patients seek care from wherever they can get it, when they think they need it (e.g., other physicians, urgent or emergency care).				Our team encourages, facilitates and promotes continuity with our own patients.		
1	2	3	4	5		
Access for patients is limited by the physician's schedule, resulting in wait times for appointments.				Patients can access the most appropriate member of the care team, in a timely manner, when they need or want an appointment.		
1	2	3	4	5		
Our team makes care decisions based on our understanding of the most important medical needs.						
1	2	3	4	5		
The physician alone supports the patient in care planning.				Team members work together, and with the patient, to support care planning.		
1	2	3	4	5		
A clinic visit is the primary or only method of interaction.				Our team uses a variety of ways to engage the patient most effectively (e.g., email, text, group visits, etc.).		
1	2	3	4	5		

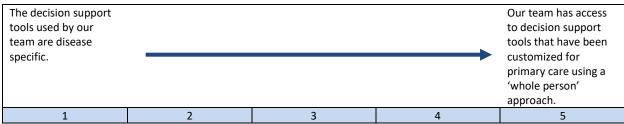

Patient Self-Management Strategies

Evidence Based Clinical Decisions

Transitions of Care

We don't know what community resources are available or how to access them.				Our team knows the resources available in our community and how to access them.
1	2	3	4	5
When we make referrals to specialists, we don't know if or when an appointment is booked.				Our team, along with the patient, collaborates with specialty care and are informed and updated in real-time on referral status and outcomes.
