

Once a physician is enabled on CII, follow these steps to send consults to Netcare*.

1. Patient must have an appointment.
2. Create a consult report as normal, including attachments as appropriate.
3. Ensure **'Consult Report'** is selected from the 'Title' drop-down menu.
4. Click **'Send Letter' or 'Print'**. The 'Consult Report' (and any associated attachments) is sent to Alberta Netcare as a pdf consult report that evening as set up in configuration.
