

Pediatrician Panels

We recognize that pediatricians around the province have different models of practice. Some may have a significant caseload of patients with a little or no panel, others may have a substantial number of patients who qualify as a panel.

With that in mind, for the purposes of participating in CII/CPAR a panel of patients for a pediatrician can be thought of as:

- that group of patients for whom you:
 - provide comprehensive longitudinal care and consider that you “quarterback” their care, and:
 - wish to:
 - declare yourself to the rest of the health care system as their primary provider, or as a partner in their primary care team in Alberta Netcare (it will display beginning in June 2021 in the patient’s Netcare record)
 - receive [eNotifications](#) of events at AHS facilities such as ER discharges, inpatient admissions and discharges, and day surgery discharges

How to panel for CII/CPAR in Healthquest

In the demographic area of the patient chart the basic information that is needed for patient panel identification for CII/CPAR is:

- Full Name
- Default Doc
- Alberta Health Care # (PHN)
- Date of Birth
- Gender
- Confirmation Date (checked “Verified” with a date)

The screenshot shows the 'Client Entry / Editing' window in Healthquest. The patient's name is Burbridge Renaud, with chart number CIIF1. The form includes fields for Name (Burbridge, Renaud, Palconit), Address (4002 - 38 Street), Phone (780) 396-8459, PHN (221424009), City (Bonnyville), Gender (Male), Date of Birth (11/25/1980), Age (37), and Province (Alberta). It also shows the patient's status as a 'Valid Alberta Patient' and includes checkboxes for 'Online Booking' and 'Scanned'. The 'Verified' checkbox is checked with a date of 1/31/2018. At the bottom, there are buttons for 'Acct Summary', 'Scans', 'AHC History', 'Statement', 'Letters', 'Appointments', 'Labels', 'Clipboard', and 'History'.

Note: key items to consider are:

- The “Verified” field: the checkbox must be checked and there must be a date in the date field
- The end date and the end date reason fields must be blank

Five Key Changes in Behaviors at the Practice

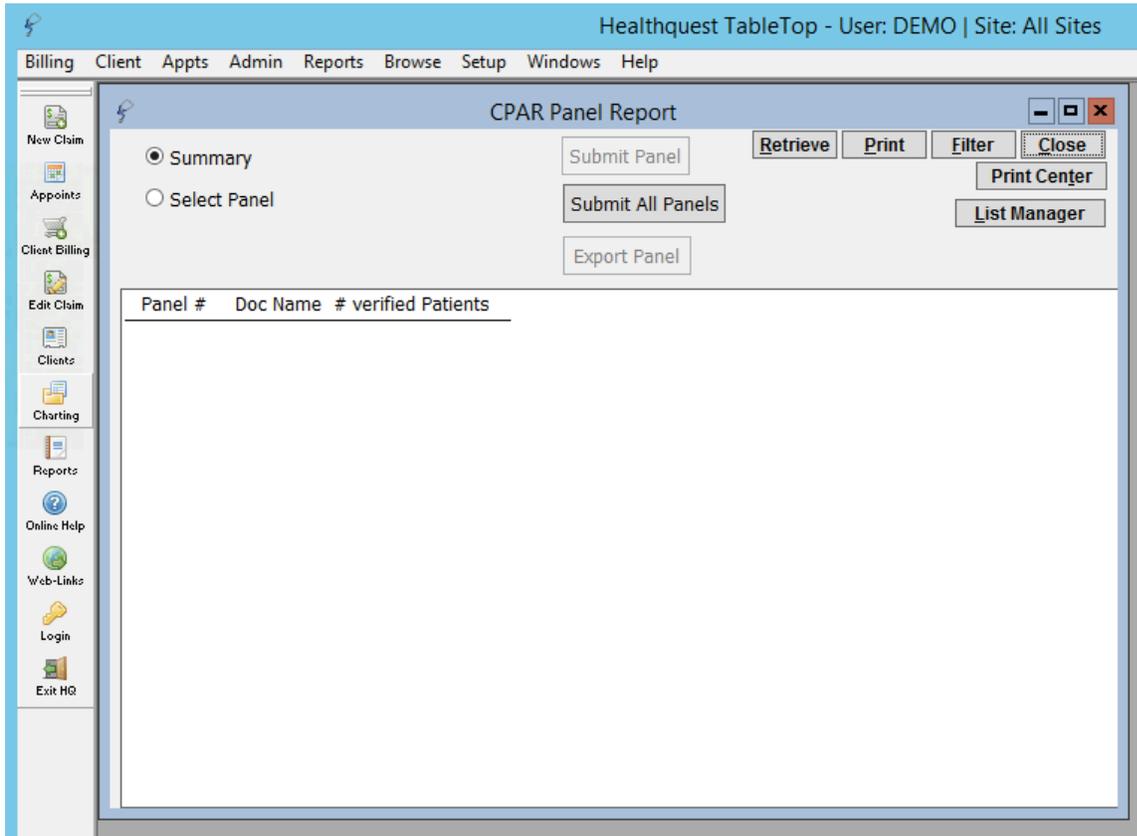

1. Regularly confirm that both you and the patient consider that you are “quarterbacking” their care
2. Record the confirmation in the EMR in the “Patient Data Verified” field with a date
3. Maintain & review the panel list at regular intervals
4. Utilize the panel list to plan care delivery
5. Submit the panel list to CPAR (Microquest is moving to an automated upload of panels beginning May 2021. The manual upload button will remain and be an option for clinics to use)

Report of Panel List and Upload

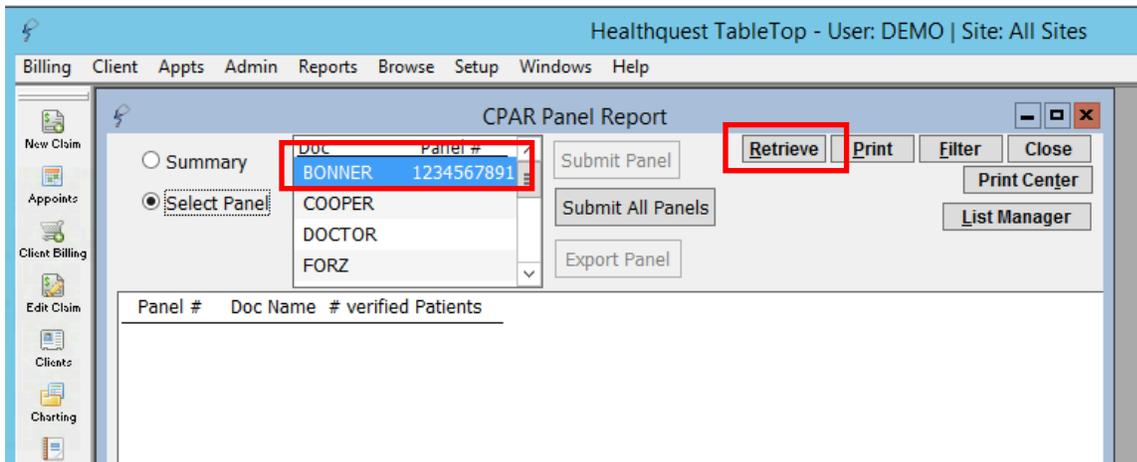

To view a list of patients that will be uploaded to CPAR there is a set report available in **Reports > Client Lists > CPAR Reporting**

On the CPAR report click **Select Panel**

Choose the Provider (Doc) and then click **Retrieve**

The panel list will appear

Physician's panel # appears here

Note: This is a list from a test database. For actual submission, each patient will have a **PHN**. Each patient must have a **last visit date** to be accepted by CPAR.

Reviewing the Panel List

It is an important step to review the panel list and look for:

- Accuracy of paneled patients
- Factors that would cause that patient record to be rejected by CPAR:
 - Patients with special characters in their names
 - Patients without a last visit date
 - Patients with a blank PHN

Make corrections before submission.

The report gives you a count of how many patients are on the list. You can print the list, filter, export or send to the List Manager.

During the CPAR submission period for CPAR, click **Submit Panel** (Beginning in May 2021, panels will be automatically uploaded on the 8th of each month by Microquest).

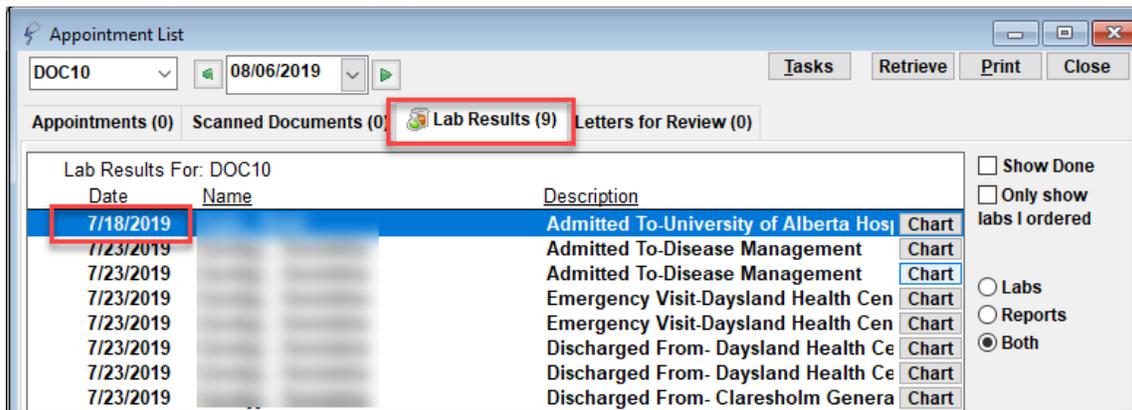

If there are many provider panels in the clinic and each list has been reviewed and is ready to send, a Panel Administrator may click **Submit All Panels**. All panels will be sent to CPAR.

eNotifications in your Healthquest EMR

Uploading your paneled patients to CPAR enables routing of eNotification alerts to your EMR inbox when one of your paneled patients has an event at an AHS facility. eNotifications are sent for:

- Emergency room discharges and left without being seen
- Inpatient admissions and discharges
- Day surgery discharges

eNotifications appear in the Lab Results tab of a provider’s Appointment List. They are delivered twice daily at 6am and 2pm. The date displayed is the date the event occurred:

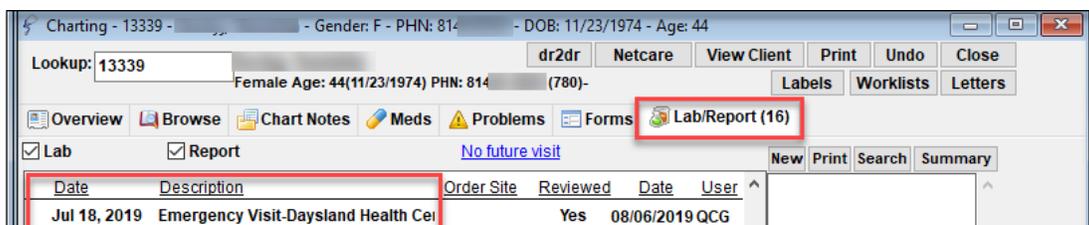

Team members with access to the lab results can see the eNotifications and responding can be teamwork. The eNotification includes basic information:

- Pt demographics
- Facility location
- Date/time
- Attending provider
- Admission reason (if available)
- Additional providers notified (if multiple providers have identified the patient on their CPAR panel).

It is important to check Alberta Netcare for additional information about the encounter before following up with the patient.

The notice remains in the lab/report tab of the patient chart and is coded with:

- Date: Date the event occurred
- Document Type: Notification
- Admission or Discharge
- Inpatient, Outpatient or Emergency
- Facility (e.g., Daysland Health Centre)

About deceased patients

The notice will include a deceased notification next to the patient’s name if the information is available in the data feed from the AHS facility’s Admission, Discharge Transfer (ADT) system. If the data includes both the patient name and the date of death, both will be displayed: Patient Name (Deceased: YYYY-MM-DD). If the ADT data does not include a date of death, then only the deceased notification will be shown: Patient Name (Deceased). ANP can be checked in the meantime to see if a death has been recorded by the AHS facility. Once the death has been registered with Vital Statistics, the date of death will be shown on the CPAR demographic mismatch report after the next panel submission.

At the clinic mark the patient as deceased on their client card so the patient will not load to CPAR in the next monthly upload. You can do this by applying any “End Date Reason” to the client card. Another way the patient will not upload to CPAR is if you change the Default Doc to a blank field.

More Panel Resources:

Additional resources are available for clinic team members maintaining the panel on the [Panel Resources](#) page.

The [Panel Readiness Checklist](#) is a valuable tool to determine if your clinic is panel ready before participating.
